SUMMARY

Systems Analyst and Developer with over 2 years of experience in data analysis and engineering, working on the development of financial and CRM dashboards, ETL pipelines, OLAP cubes, and Data Marts. Proficient in Python, SQL, SSAS, Power BI, Power Query, Excel, Git, Databricks, and Snowflake, with experience in Azure and AWS environments. My main achievement was leading the development of a revenue and CRM tracking system for Warren Rena brokerage, delivering strategic insights to economists and C-level executives and driving data-driven decision-making.

SKILLS

Python · Automation & Scripting

Advanced SQL · NoSQL

ETL / ELT Pipelines

Data Modeling / Star Schema

BigQuery · Snowflake · Redshift

GCP / Dataflow / Cloud Storage

Power BI · Looker · Tableau

n8n · Orchestration & Workflow

Claude AI · Gemini · LLMs

AI Agents · RAG · MCP

Pandas · NumPy · PySpark

Streamlit · Flask · FastAPI

WORK EXPERIENCE

Mercado Pago - MercadoLibre Fintech

Jul 2025 - Present

Data Analyst & Automation Developer - Funding

Ranked top 0.41% of GenAI users among 10,000+ MELI employees — led LLM tool adoption (Claude, Gemini, MCP, n8n), increasing team coding productivity by ~50%. Designed and deployed ETL pipelines and orchestrated workflows using n8n (Verdi Flows) and Dataflow, unifying financial data from 4+ sources and saving ~1 hour of manual work daily. Built automated data quality controls and classification system for financial movements, reducing monthly closing by 4 hours. Implemented regulatory data monitoring for the CVM portal, ensuring early detection of reconciliation inconsistencies — directly improving data accuracy for investors. Led data governance migration to Data Mesh (DME), standardizing documentation and scalability across all Funding data assets. **Tech:** Python, Advanced SQL, BigQuery, Dataflow, n8n, GCP, LLMs, Looker Studio, Data Modeling

Warren Investimentos

Jan 2025 - Jun 2025

Data Analyst

Built self-service reporting infrastructure and financial dashboards for C-Level tracking BMF, Bovespa, Private Credit, and Government Bonds trading desks. Designed and optimized ELT pipelines in Databricks (PySpark + SQL), reducing data processing time through query optimization and automation. Collaborated with economists and strategists on ad-hoc analysis and performance metrics, applying window functions and complex aggregations for accurate financial KPIs.

Tech: Databricks, PySpark, Advanced SQL, Python, Power BI, Query Optimization

Intel - Remote to US

Sep 2023 - Nov 2024

Data Engineer / BI Developer

Designed and maintained CRM data pipelines from Salesforce using Databricks, Snowflake (cloud DWH), and SSAS, implementing data models and SQL views for a global English-speaking team. Reduced KPI calculation time in Salesforce by 90% using Azure Data Factory and Databricks with PySpark. Built self-service dashboards in Power BI and Tableau applying DAX, data storytelling, and data modeling best practices to support sales decision-making. **Tech:** Databricks, Snowflake, SSAS, Power BI, Tableau, SQL, Python, Azure DevOps, Azure Data Factory

BTG Pactual Banking

Aug 2022 - Ago 2023

Data Analyst

Delivered a Corporate Lending Dashboard with ETL pipelines (SQL + M language), data modeling, and business KPIs — contributing to a 20% increase in revenues. Built self-service Power BI reports applying SQL SSAS, DAX, and UX/UI best practices. Engaged directly with end users to gather requirements, created prototypes, and managed projects end-to-end.

Tech: Power BI, SQL, SSAS, DAX, ETL, M Language, Data Modeling
